Task 2.5

Download the **latest** image of Selenium Server:

docker pull selenium/standalone-chrome:**latest**

Run it so that in localhost of your browser you can see the start page of the Selenium Server. Find the Selenium Server version on it.

Submit:

1) the word or pdf or txt file with the latest **Selenium Server version** number that you got
2) the full screenshot where we can see the version

***The version usually appears above like that:*
